

PRESS RELEASE

**PT. Supreme Energy Muara Laboh starts Commercial Operation
for Muara Laboh Geothermal Power Plant Development**

Jakarta, 16 December 2019.

PT. Supreme Energy Muara Laboh (SEML), a joint venture of PT. Supreme Energy, ENGIE and Sumitomo Corp, announced today the commercial operation of Stage-1 Muara Laboh Geothermal Power Generation located in Solok Selatan Regency, West Sumatra Province. The power generation has the capacity of 85 MW net. The electricity will be supplied to PLN Sumatra grid to be able to distribute electricity for 340,000 households.

PT. Supreme Energy started the preliminary study in 2008, signed the Power Purchase Agreement (PPA) in 2012 and started with exploration activities immediately. Total investment for this Stage-1 development is USD 580 million. PT. Supreme Energy is currently also in discussion with PLN and the Ministry of Energy and Mineral Resources for the development of another 65 MW Geothermal Power Generation at the same area. This Stage-2 development will

require an investment of USD 400 million and will be started immediately upon the conclusion of the PPA discussion.

"Muara Laboh Stage-1 COD and the plan for Stage-2 development represent a very strong commitment of PT. Supreme Energy and its international partners towards the development of Geothermal Energy in Indonesia to support the Government of Indonesia achieving 2025 energy mix objective. We appreciate the continued supports from the Government, PLN and Solok Selatan community especially during the exploration and development." the Chairman of PT. Supreme Energy, Mr. Supramu Santosa said.

Currently, PT. Supreme Energy is also constructing 90 MW Geothermal Power Generation Project by PT. Supreme Energy Rantau Dedap (SERD), in South Sumatra Province, which is scheduled to be completed in the end of 2020. To complete this project, SERD will invest around USD 700 million. Through PT. Supreme Energy Rajabasa (SERB), PT. Supreme Energy is also preparing the exploration program for Gunung Rajabasa Working Area located in South Lampung Region. The exploration will commence as soon the PPA extension with PLN is concluded.

SEML and SERB are Joint Venture Companies consisting of PT. Supreme Energy, ENGIE of French and Sumitomo Corp. of Japan, while SERD is a joint venture of PT. Supreme Energy, ENGIE, Marubeni Corp. of Japan and Tohoku Electric Power of Japan.

About Supreme Energy

PT Supreme Energy was founded in 2007 by professionals with long experience and knowledge in energy sector in Indonesia, and directly involved in the oil and gas industry and geothermal development and operations for the past 40 years. Supreme Energy signed a PPA in 2012 for the development of three geothermal working areas, and is one of the pioneers of a private geothermal power producing company in Indonesia. In addition to the Muara Laboh Project, Supreme Energy also developed and built the 90 MW Geothermal Power Project in the Rantau Dedap located in Pagar Alam of the South Sumatra Province, and prepared an exploration program for the Gunung Rajabasa Geothermal Project in South Lampung Regency, Lampung Province.

About ENGIE

ENGIE is a global reference in low-carbon energy and services. In response to the urgency of climate change, their ambition is to become the world leader in the zero carbon transition of their customers, in particular businesses and local authorities. We rely on our key businesses (renewable energy, gas, services) to offer competitive turnkey solutions "as a service".

With our 160,000 employees, our customers, partners and stakeholders, we are a community of Imaginative Builders, committed every day to more harmonious progress.

Turnover in 2018: 60.6 billion Euros. The Group is listed on the Paris and Brussels stock exchanges (ENGI) and is represented in the main financial indices (CAC 40, DJ Euro Stoxx 50, Euronext 100, FTSE Eurotop 100, MSCI Europe) and non-financial indices (DJSI World, DJSI Europe and Euronext Vigeo Eiris - World 120, Eurozone 120, Europe 120, France 20, CAC 40 Governance).

About Sumitomo Corporation

Sumitomo Corporation is one of the leading trading companies from Japan and has been involved in various business activities, handling various products and services, carrying out import/export and transaction trilateral business activities, providing global investment business and participating in many other profitable activities facilitated through networks global. Sumitomo has been active in the private power generation business since 1990 and has shown consistent growth in the market. The company has more than 5,518 MW of current nett capacity, and supplies more than 50,000 MW of power plant facilities as EPC (engineering, procurement and construction) contractors. For geothermal power, Sumitomo has supplied more than 2,445 MW of generation facilities globally and 729 MW in Indonesia.
